Memphis, Tennessee · eoralabs.com

CompTIA CySA+ (CS0-003) · Security+ (SY0-701) · Network+ (N10-008) · ISC2 Certified in Cybersecurity (CC)

## Professional summary

IT professional with 7+ years of experience spanning the full technology asset lifecycle — procurement support, provisioning, endpoint deployment, license and inventory management, hardware repair coordination, and secure disposal — across government and HIPAA-regulated healthcare environments. Currently provides on-site Tier I/II IT support for Lakeside Behavioral Health (UHS), a HIPAA-regulated, 400-employee inpatient behavioral health campus. Previously administered Windows Server infrastructure, Active Directory, and Microsoft 365 for a 5,000+ user county government environment, with direct responsibility for endpoint provisioning, MDM enrollment, patch management, and asset inventory documentation. Experienced managing license assignment, device compliance, and configuration standards across multi-site enterprise deployments. Holds CompTIA CySA+, Security+, Network+, and ISC2 CC certifications. Completed a Bachelor of Business Administration in Management Information Systems at the University of Memphis, May 2026. Known for structured, root-cause problem solving, meticulous documentation, and dependable follow-through on customer-facing technical requests.

## Core competencies

### Attention to detail

Meticulous asset inventory records, configuration documentation, and change logs maintained across a 5,000-user Active Directory environment, where accuracy in device assignment, license tracking, and permission configuration carries direct operational and compliance consequences.

### Customer service

Seven years of direct technical service delivery to clinical, administrative, and government personnel across multi-site enterprise environments. Experienced in after-hours incident response, clear communication of solutions, and follow-through to confirmed resolution.

### Asset and license lifecycle

Endpoint provisioning, MDM/device enrollment, patch cycles, and hardware lifecycle documentation; Microsoft 365 license allocation and tracking, mailbox provisioning, and MFA configuration across enterprise tenants.

### Problem solving

Applies structured, root-cause diagnostic methodology to inventory, provisioning, and infrastructure issues — isolating variables, cross-referencing monitoring data, and implementing targeted fixes that minimize service disruption and downtime.

---

## Technical qualifications

**Asset and device management**

Endpoint imaging and deployment, MDM/mobile device enrollment, device compliance configuration, hardware lifecycle documentation, asset inventory tracking, patch management.

**Identity and license management**

Active Directory, Group Policy, Microsoft 365 license assignment and harvesting, Exchange Online mailbox provisioning, distribution list management, MFA/RBAC.

**Operating systems**

Windows Server 2016/2019, Windows 10, Windows 11.

**Virtualization and cloud**

VMware vSphere, Hyper-V, Microsoft Azure (foundational), Microsoft 365 administration.

**Networking and infrastructure**

DNS, DHCP, TCP/IP, VLANs, VPN, RDP, SMB, switch port administration, Orion SolarWinds monitoring.

### Cybersecurity

Endpoint protection, vulnerability management, security hardening, log review, HIPAA compliance.

### Automation and documentation

PowerShell scripting, automated software deployment, ITIL-aligned incident/change management, knowledge base authoring.

### Remote and repair support

Citrix thin client support, Bomgar remote support, hardware diagnostics and repair coordination.

### Languages

English (native). Mandarin Chinese (basic exposure, non-fluent).

---

## Professional experience

### IT Support Technician · Lakeside Behavioral Health (UHS)

**September 2026 – Present**

Memphis, Tennessee · 40 hours per week · On-site support for a 39-acre, 400-employee behavioral health campus

- Provide on-site Tier I/II support as one of two IT staff for a HIPAA-regulated inpatient behavioral health facility, covering endpoints, printers, VoIP phones, and network drops across multiple buildings and clinical units.
- Troubleshoot Avaya IP phone outages down to the switch port, identifying suspected err-disabled ports and voice VLAN problems, and write escalations to corporate network and telecom teams with MAC addresses, serials, and specific remediation steps.
- Trace and document physical-layer cabling at IDFs with a tone generator, mapping phone and printer drops to switch ports to build the site's cable map.
- Audit and asset-tag the multifunction printer fleet across five units, recording IP, serial, firmware, and asset tag, and correct inventory records where they're wrong.
- Provision new-hire workstations end to end (Dell laptop and dock, multi-monitor setup, Avaya J179), coordinating extension assignment with the PBX administrator.
- Replace failed hardware on clinical workstations on wheels and document device, network, and hardware details ahead of planned retirements.

- Resolve password resets, account lockouts, VPN, and SSO access requests for clinical and administrative staff.
- Designing a SharePoint self-service IT ticketing system (Microsoft Forms/Power Apps, Power Automate alerts, knowledge base, PnP PowerShell deployment), approved by my supervisor, to take routine requests off the IT team.

### Customer Support Technician II · Shelby County Government

**April 2024 – May 2026**

Memphis, Tennessee · 40 hours per week · On-call rotation every other month

- Administered enterprise Windows Server infrastructure, Active Directory, and Microsoft 365 services supporting 5,000+ users, including endpoint asset assignment, organizational unit structure, and license allocation across county departments.
- Provisioned and enrolled endpoints into device management and MDM platforms, verifying compliance configuration and organizational unit placement upon deployment or domain rejoin — maintaining accurate asset and identity records.
- Managed Microsoft 365 tenant administration including license assignment and harvesting, Exchange Online mailbox provisioning, distribution list management, and MFA configuration for county personnel.
- Oversaw endpoint patch management cycles and routine maintenance scheduling across desktops, laptops, and servers to sustain asset availability and operational stability.
- Troubleshot complex network connectivity failures at the switch level using Orion SolarWinds monitoring, locating devices by MAC address and restoring service with minimal disruption.
- Authored PowerShell automation scripts for enterprise software deployment, including a script to silently install Oracle Smart View with required runtime dependencies across multiple workstations, reducing manual provisioning overhead.
- Provided Tier II/III technical guidance to end users and junior staff, escalating complex issues appropriately and documenting resolutions for team knowledge base use.
- Created and maintained technical documentation, procedural guides, and knowledge base articles supporting operational continuity and audit readiness.

### IT Field Engineer · eResources, LLC

**April 2023 – August 2023**

Memphis, Tennessee · 40 hours per week · Travel required to multiple client sites across the Memphis metro area

- Installed, configured, and deployed Windows Server and client systems for healthcare, construction, and small business clients — assessing environments to determine appropriate hardware and configuration standards.
- Performed system imaging, domain joins, and endpoint provisioning for newly deployed workstations and servers, applying Group Policy and role-based access controls to enforce compliance requirements.
- Diagnosed and resolved network outages, firewall misconfigurations, and connectivity issues across multi-site client environments with minimal downtime.
- Supported Citrix-based thin client environments running Epic EHR for a Baptist Memorial Hospital-affiliated clinic network, troubleshooting application delivery and endpoint configuration.
- Maintained detailed service logs and resolution records supporting accurate client billing and service continuity documentation.

### IT Technician · Alliance Healthcare Services

**November 2018 – April 2023**

Memphis, Tennessee · 40 hours per week · On-call one week every two weeks · Multiple clinic locations

- Maintained asset inventory, hardware lifecycle documentation, and system configuration records supporting HIPAA compliance and operational visibility across multiple clinic locations.
- Enrolled and configured mobile devices into the organization's MDM platform, managing device compliance and configuration standards enterprise-wide.
- Provisioned and managed user accounts, configured MFA, and resolved identity and access issues for clinical and administrative staff across all clinic sites.
- Deployed endpoints, managed patch cycles, and performed endpoint hardening to maintain security and regulatory compliance in a HIPAA-regulated environment.
- Provided after-hours on-call incident response during outages and upgrades, restoring service continuity across clinic sites outside normal duty hours.

---

## Additional employment — 2023 to 2024

While completing coursework toward a Bachelor of Business Administration at the University of Memphis: Package Handler, FedEx Ground (part-time); Delivery Driver, Domino's Pizza (part-

time); Grocery Associate, The Fresh Market (part-time) — roles emphasizing high-volume accuracy, time-sensitive processing, and direct customer service.

---

# Education

### Bachelor of Business Administration, Management Information Systems

**Conferred May 2026**

University of Memphis, Memphis, Tennessee · GPA 3.28 · SACSCOC accredited

### Associate of Science, General Studies – Information Systems (Tennessee Transfer Pathway)

**Conferred 2022**

Southwest Tennessee Community College, Memphis, Tennessee · GPA 3.8 · SACSCOC accredited

---

# Professional certifications

- CompTIA Cybersecurity Analyst+ (CySA+), CS0-003. Issued May 10, 2025. Expires May 10, 2028.
- CompTIA Security+, SY0-701. Issued November 17, 2024. Expires November 17, 2027.
- CompTIA Network+, N10-008. Issued December 15, 2023. Expires December 15, 2026.
- ISC2 Certified in Cybersecurity (CC). Issued February 1, 2024. Expires January 31, 2027.
- CompTIA A+ (historical). Issued April 20, 2018. Expired April 20, 2023.
